Preface

The New Idea Nursery Mathematics series is a well thought out activity based book used to introduce pupils to mathematics using everyday objects as examples.

The objective of the book is to make the teaching of mathematics interesting thereby igniting an interest in the subject in pupils.

The author, knowing that the foundation of mathematics as taught to pupils will serve as a basis of their interest in mathematics, wants to make sure that the pupil has a solid foundation in basic mathematical concepts thereby making them like the subject.

We hope that in the use of this three(3) series textbook pupils, teachers and parents get value for their money while educating a generation of pupils that will move Nigeria and the world forward.

3 colour 1 (one whole) **4** colour $\frac{1}{4}$ (one quarter)

LESSON: SIMPLE DIVISION

Topic: Learning how to divide

Division means **sharing**.

The mathematical sign for division is \div

Example 1

How do you share **2** icecreams between Jide and Ama?

You give Jide **1** icecream and Ama **1** icecream.

How many icecreams did each person get? **1** right? Yes.

This means **2** icecreams divided by **2** people ($2 \div 2 = 1$)

Example 2

How do you share **6** sweets between Abu, Joy and Jane?

You give Abu, Joy and Jane **2** sweets each.

How many sweets did each person get? **2** right? Yes.

This means **6** sweets divided by **3** people ($6 \div 3 = 2$)

Example 3

$$4 \div 2 = \boxed{2}$$

$$10 \div 2 = \boxed{2}$$

$$9 \div 3 = \boxed{3}$$

Activity: Divide the following and write

1 $2 \div 1 = \square$

6 $6 \div 3 = \square$

2 $4 \div 2 = \square$

7 $4 \div 4 = \square$

3 $8 \div 4 = \square$

8 $8 \div 4 = \square$

4 $4 \div 1 = \square$

9 $10 \div 5 = \square$

5 $6 \div 2 = \square$

10 $10 \div 2 = \square$

LESSON: INTRODUCTION TO SIMPLE ADDITION

Topic: Learning how to add numbers

Addition means **adding something to something else**.

The mathematical sign for addition is **+**

Example

What happens when you add **2** oranges to **2** oranges?

We get **4** oranges

Similarly, adding **6** apples and **4** apples gives you **10** apples.

Hence;

$$2 + 1 = \boxed{3} \quad 5 + 7 = \boxed{12} \quad 10 + 1 = \boxed{11}$$

Activity: Add the following numbers and write

- | | | | |
|---|---------------------------------|---|----------------------------------|
| 1 | $2 + 1 = \boxed{}$ | 4 | $16 + 10 = \boxed{}$ |
| 2 | $4 + 2 = \boxed{}$ | 5 | $13 + 3 = \boxed{}$ |
| 3 | $6 + 10 = \boxed{}$ | 6 | $20 + 20 = \boxed{}$ |

LESSON: INTRODUCTION TO MULTIPLICATION

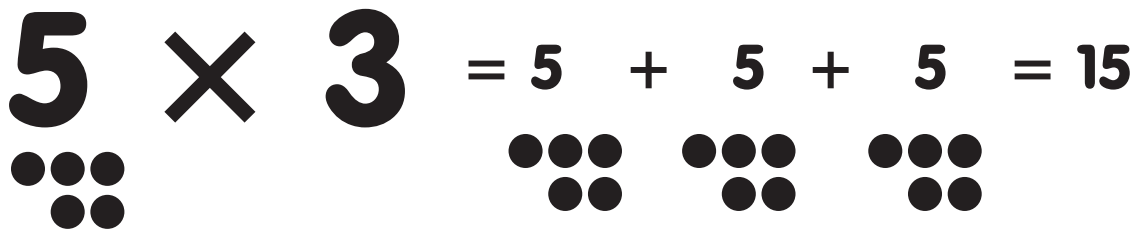

Topic: Learning how to multiply

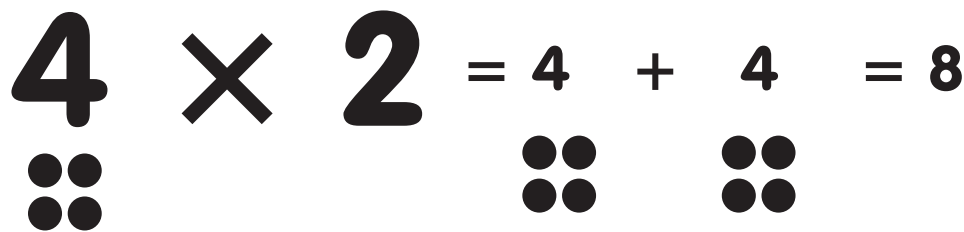

Multiplication is the **process of multiplying**.

The mathematical sign for multiplication is **\times**

The basic idea of multiplication is repeated addition.

Example

$$5 \times 3 = 5 + 5 + 5 = 15$$

$$4 \times 2 = 4 + 4 = 8$$

In the first example, **5** is added **3** times to itself to get **15**

In the second example, **4** is added **2** times to itself to get **8**

Activity: Multiply the following numbers and write

1 $2 \times 2 =$

4 $6 \times 2 =$

2 $3 \times 6 =$

5 $4 \times 3 =$

TEACHER'S GUIDE:

The teacher should explain that multiplication also works vice versa. eg. $5 \times 3 = 15$, $3 \times 5 = 15$ using the analogy in the example above.

Activity: Multiply the following numbers and write

1 $1 \times 2 = \square$ 6 $3 \times 2 = \square$

2 $5 \times 1 = \square$ 7 $4 \times 4 = \square$

3 $5 \times 3 = \square$ 8 $5 \times 2 = \square$

4 $3 \times 3 = \square$ 9 $6 \times 6 = \square$

5 $2 \times 3 = \square$ 10 $1 \times 1 = \square$

LESSON: INTRODUCTION TO SUBTRACTION

Topic: Learning how to subtract

Subtraction is the **process of taking one number away from another.**

The mathematical sign for subtraction is **—**

Example

Lets start with **5** apples

then subtract **2**

Now count how many apples are left? **3** apples are left.
This can be written as:

$$5 - 2 = 3$$

Activity: Subtract the following numbers and write

1 $2 - 1 = \square$

4 $4 - 2 = \square$

2 $3 - 2 = \square$

5 $5 - 4 = \square$

Activity: Subtract the following numbers and write

1 $5 - 2 = \square$ 6 $10 - 2 = \square$

2 $5 - 1 = \square$ 7 $8 - 6 = \square$

3 $6 - 3 = \square$ 8 $7 - 2 = \square$

4 $3 - 3 = \square$ 9 $11 - 9 = \square$

5 $9 - 5 = \square$ 10 $15 - 10 = \square$
